DUQUANTUM

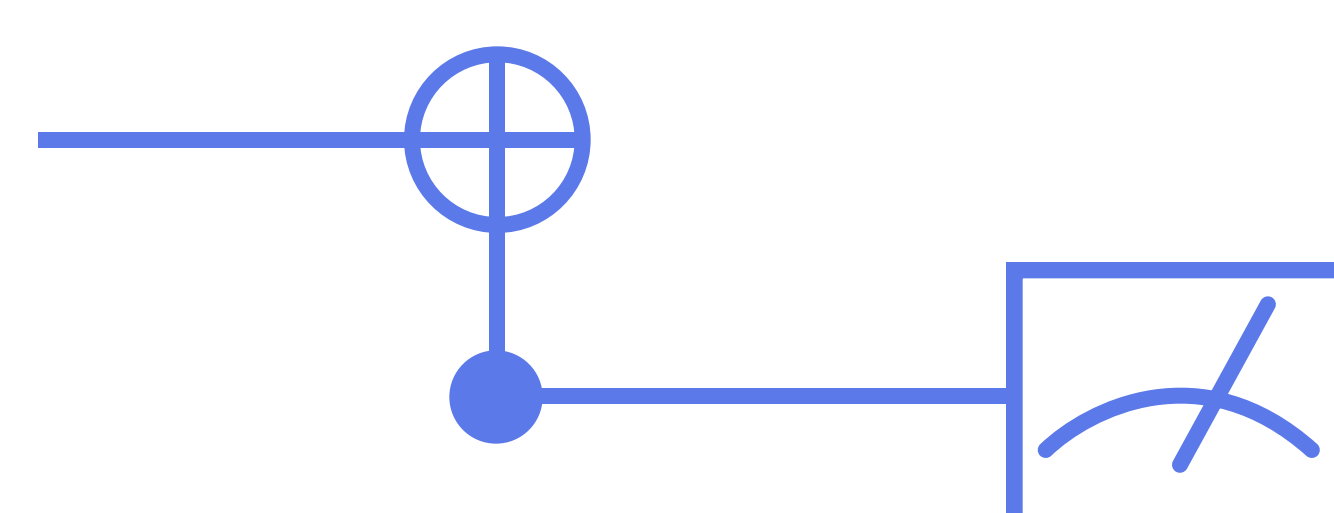

October 24-25, 2026

DuQuantum is the **first annual quantum computing hackathon** at **Duke**, a collaboration between the **Duke Quantum Information Society** (DuQIS) and **HackDuke**. We invite quantum enthusiasts of all levels of university to tackle challenges designed by industry leaders and gain experience with state-of-the-art quantum tools.

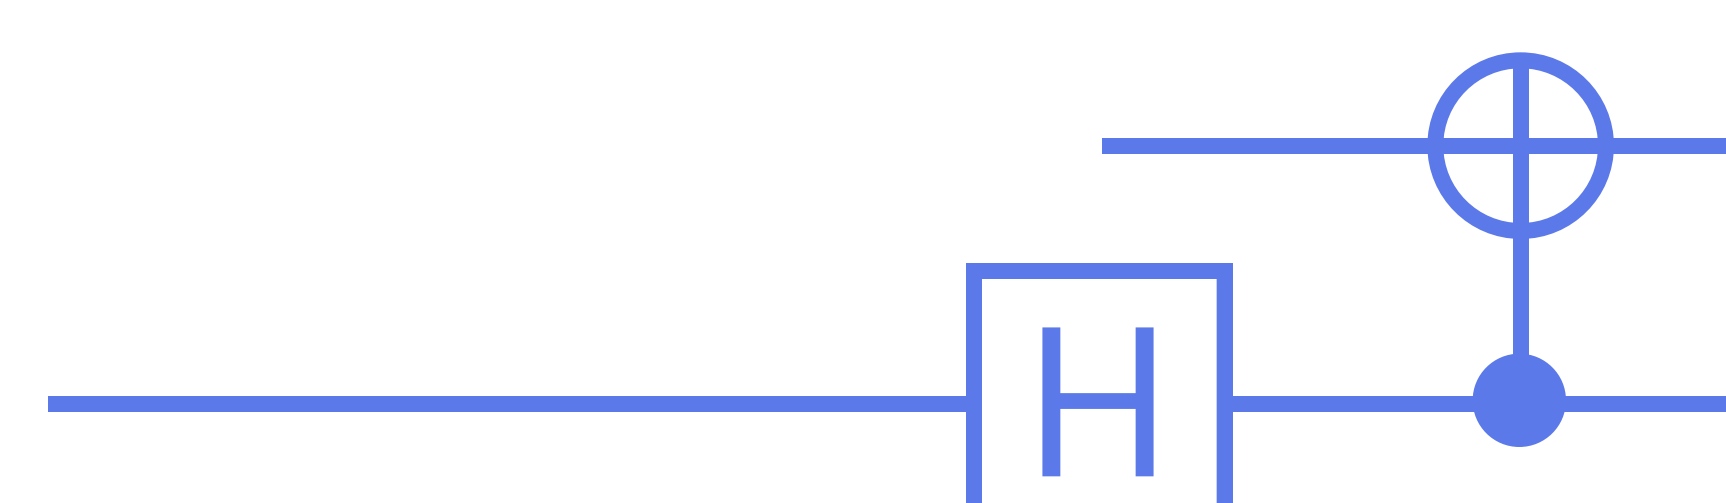

Our Target Audience

DuQuantum is designed for all backgrounds, with an emphasis on beginner-friendliness. Through our **Introductory Track**, we encourage newcomers to explore the field of quantum computing for the first time. We expect ~150 hackers from across the country, particularly the Research Triangle, including **undergraduate**, **Master's**, and **PhD** students.

Our Offerings

DuQuantum will feature **sponsor challenges** spanning topics like optimization, simulation, and quantum chemistry. Hackers will also have the opportunity to attend **workshops** and **lectures** during the 24-hour competition.

Why sponsor us?

|1⟩ Recruitment Pipeline

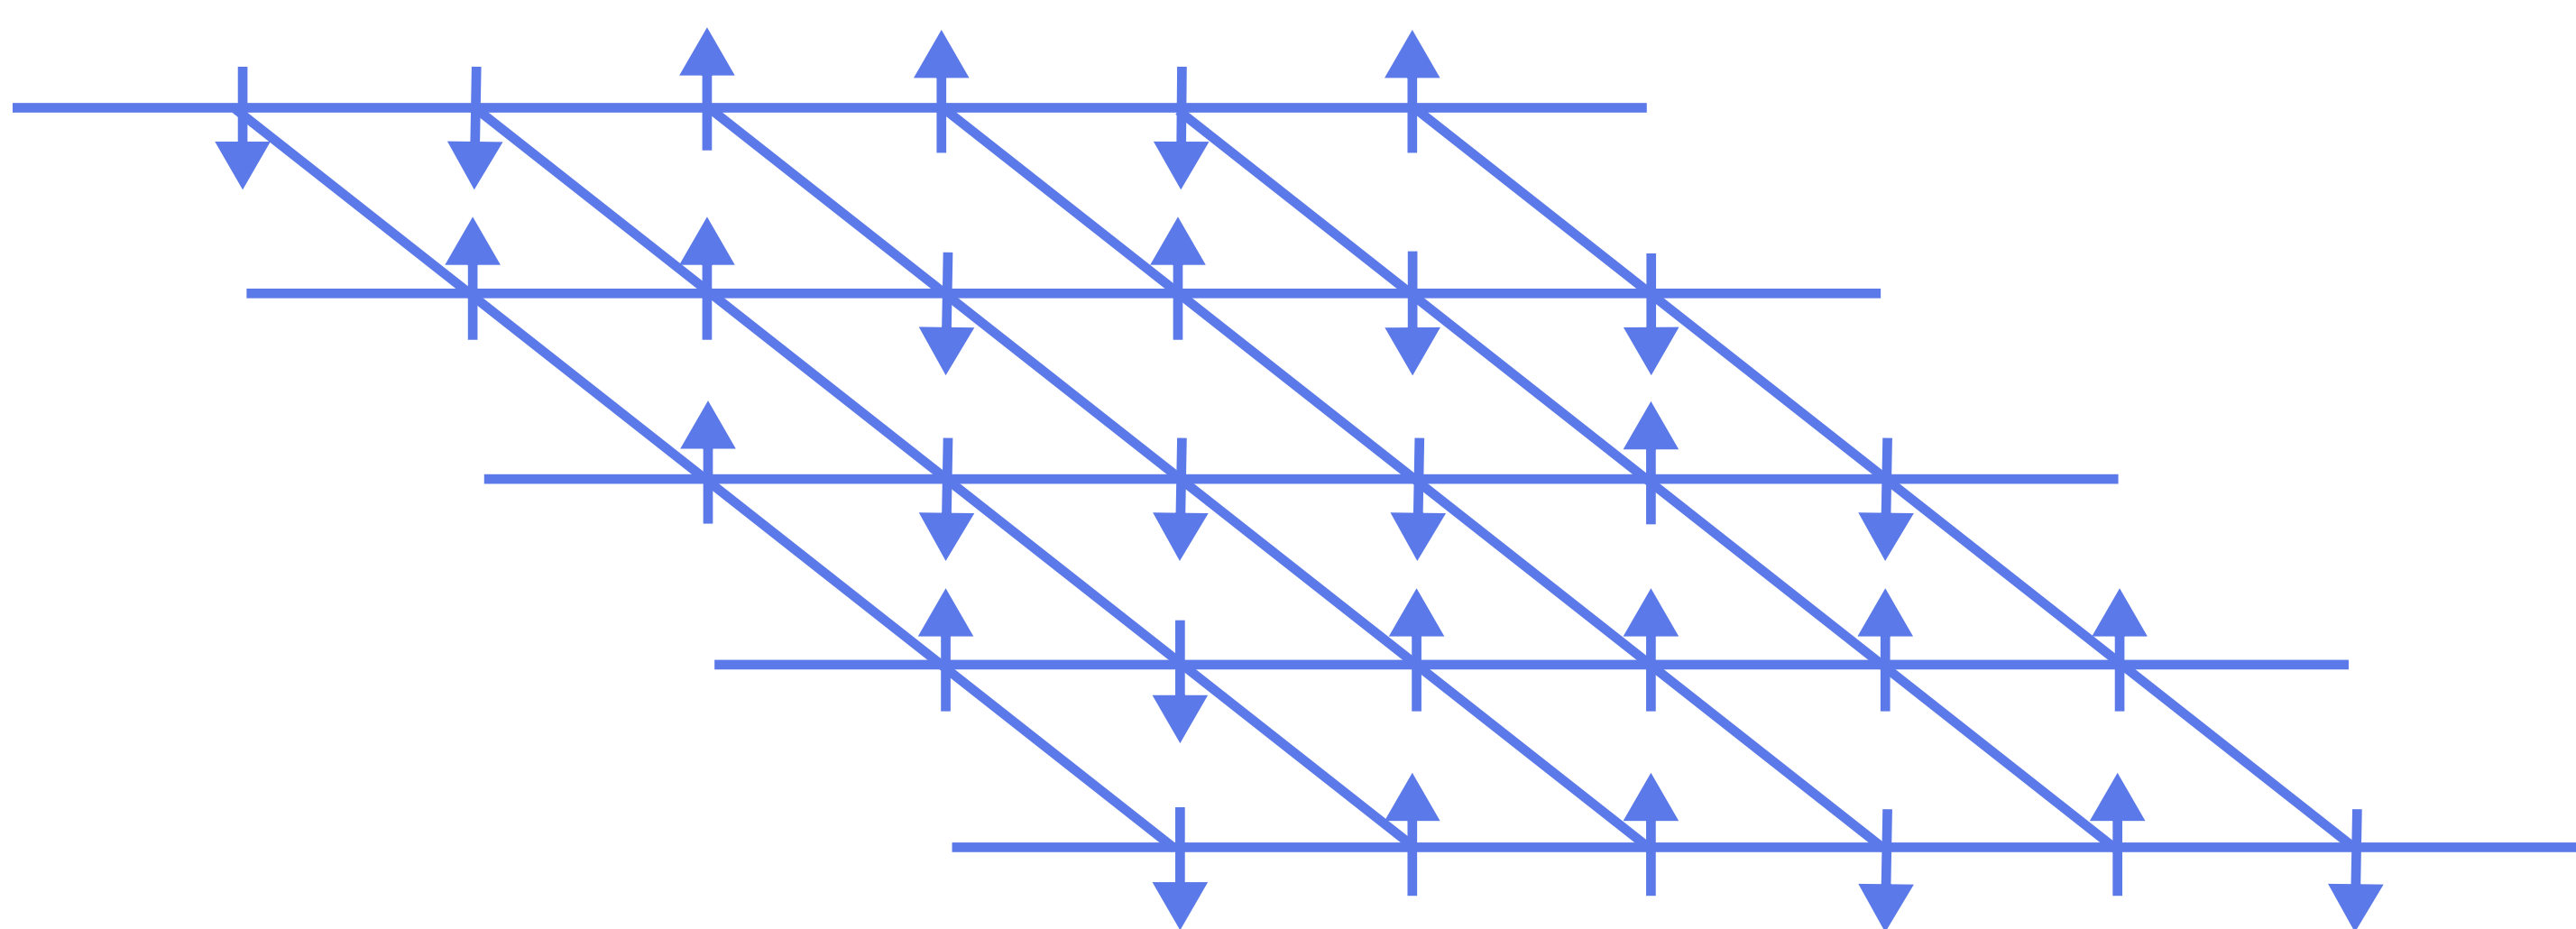

DuQuantum provides access to top quantum talents from Duke and peer institutions. By engaging with hackers as they tackle your own challenges, you secure a pipeline of interns and full-time hires proficient in your quantum stack.

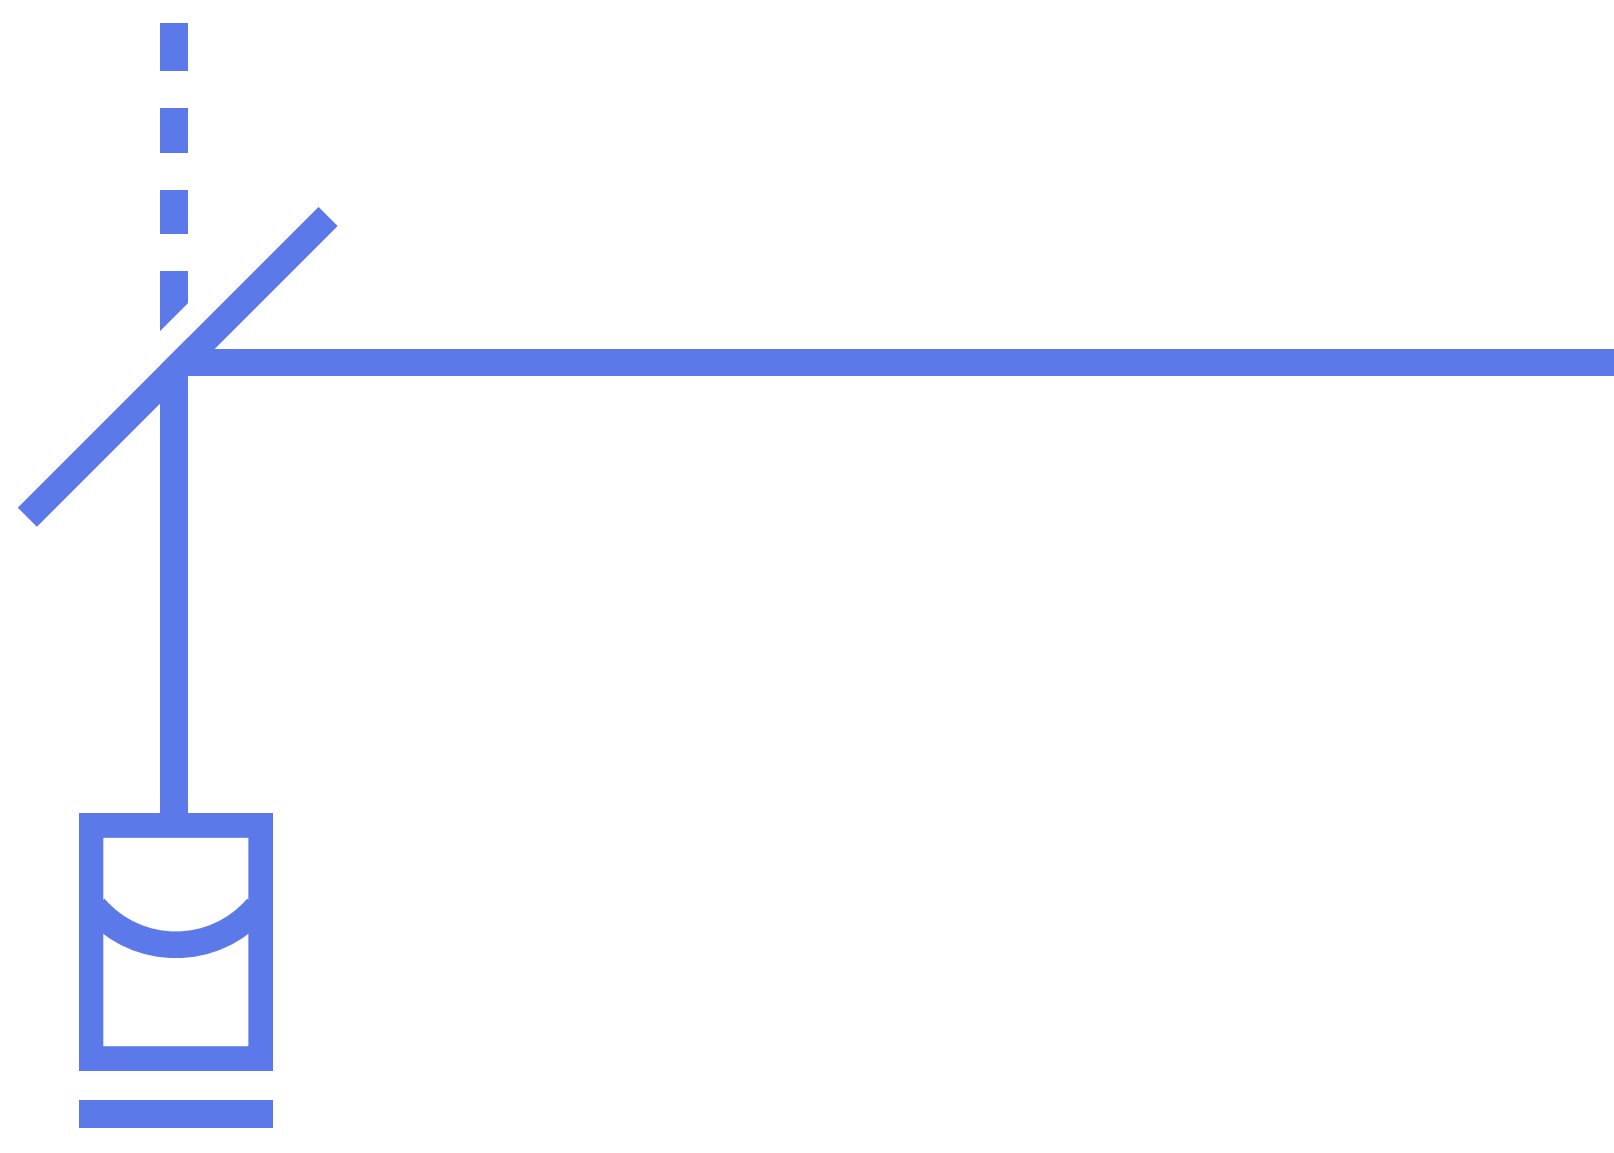

⟨2| Product Sandbox and Brand Visibility

DuQuantum becomes a stress test for your technologies, putting them directly in the hands of young builders. This provides engagement and feedback for your software and hardware in meaningful use cases, while positioning your brand and platform as the industry standard for the future quantum workforce.

|3⟩ Interaction with the Duke Quantum Center

As a sponsor, you become a partner in Duke's rich quantum computing research ecosystem, with pioneering work in trapped ion hardware and quantum error correction. Your brand becomes integrated with the academic R&D defining the field.

How can sponsors get involved?

A

We invite sponsors at the **Silver tier or above** to design a **quantum challenge**, reflective of work done at their own companies. This involves creating a project prompt or set of problems (an Introductory Track version and a standard version) that encourages hackers to learn and innovate with your proprietary technologies.

B

As the creator of your challenge, you reserve the right to recognize excellence. Company representatives will serve as the **judges** for submissions to their challenge and issue **themed prizes**.

C

We also encourage sponsors at the **Silver tier or above** to send **technical mentors** to the event to interact with hackers, provide guidance for your tools, and identify top performers. Mentors from **Platinum tier** sponsors may also run a **technical workshop** for your technology.

**** See Appendix B (upon request) for sample challenges.**

Standard Sponsor Tiers

**** See Appendix A (upon request) for detailed point system.**

Sponsor Benefits	Bronze	Silver	Gold	Platinum
\$1,000 = 1 point	1 point	2 points	4 points	8 points
Logo on merch and website	ψ	ψ	ψ	ψ
Sponsor Fair booth	ψ	ψ	ψ	ψ
Send a technical mentor [+1 point]		ψ	ψ	ψ
Sponsor a challenge (limited slots) [+2 points]		ψ	ψ	ψ
Hackers, DuQIS, and HackDuke resume book		ψ	ψ	ψ
Host a recruiting event at Duke anytime 2026-27			ψ	ψ
Run a technical workshop (limited slots)				ψ
Dedicated promo via emails and Opening Ceremony				ψ

**** Note that *custom sponsor packages* are available upon request!**
We are happy to meet and discuss.
